What is a Pathway

A Pathway is a sequence of courses defining a single set of training objectives.

Within a Pathway, more courses (labelled as *Milestones*) can be included. In courses, which mark the achievement of intermediate objectives, are concentrated several activities.

Each Pathway is concluded with a course (labelled *Capstone*). This is the concluding course of the Pathway within which all activities that formally conclude and complete the Pathway are included (e.g. final tests, certificates).

What is a Pathway

“Growing smarter for a greener tomorrow: FarmBox’s MOOC on Climate Smart Agriculture” Pathway is composed by two main courses:

- Climate Smart Agriculture for Beginners

- Climate Smart Agriculture – Advanced

You can choose to follow either one or both courses.

Climate Smart Agriculture for Beginners

The first course will provide key information about what Climate Smart Agriculture is and will present basic understanding of useful practices and techniques that can improve land management in view of biodiversity principles and climate change adaptation needs.

For more information check out the course structure and topics on the Course Index. Don't forget to watch the Video Trailer!

Climate Smart Agriculture - Advanced

The second course will provide a deeper insight about the application of Climate Smart Agriculture and will present advanced understanding of useful practices and techniques that can improve land management in view of biodiversity principles and climate change adaptation needs.

For more information check out the course structure and topics on the Course Index. Don't forget to watch the Video Trailer!

Into the course

How the courses are structured and
which activities you will find

Courses structure

Courses are structured in Modules or Units to allow self-organization of the learning path. This is also enhanced by the presentation of learning outcomes at the beginning of the course and in each Module and activity.

Each Module covers a key topic of Climate Smart Agriculture.

All Modules offer a wide range of activities: reading materials to help you understand the legal framework or to guide you through the most recent scientific papers; short video lessons to further explain key contents; interviews with farmers to present case studies; glossaries; external resources related to the courses' topics; quiz to test your knowledge and practical exercises through a virtual simulator.

Use the Course

How to give credits

LICENSES	TERMS
	 Attribution Others can copy, distribute, display, perform and remix your work if they credit your name as requested by you
	 BY
	 No Derivative Works Others can only copy, distribute, display or perform verbatim copies of your work
	 BY
	 Share Alike Others can distribute your work only under a license identical to the one you have chosen for your work
	 Non-Commercial Others can copy, distribute, display, perform or remix your work but for non-commercial purposes only.

Both courses are covered by Creative Commons Licence CC BY SA NC.

This means that you can use our contents for training purposes yet you should always provide attribution to the project “FarmBox – The farmer’s toolbox for climate change mitigation, Project n. 2020-1-IT01-KA226-VET-008891”.
